DETAILED DIGITAL PRESENCE & SEO AUDIT REPORT

Vibrant Laser Dentistry

Website · Google Business Profile · Local SEO · Social · AI Search · Conversion

1920 Vindicator Dr Ste 209, Colorado Springs, CO 80919

Audited by Md. Abdul Alim
Local SEO & AI Search Optimization Consultant
Audit Date: August 17, 2026

Website SEO Audit

Category	Score	Assessment
Website Indexing	9/10	Homepage carries "index, follow, max-image-preview:large" robots meta and a canonical tag; a live rank-tracking pull shows 457 indexed organic keywords and 183 monthly organic visits, confirming the site is well indexed.
HTTPS	10/10	Site loads and is served entirely on https://dentist-colorado-springs.com with no mixed-content issues found.
Mobile Friendly	8/10	Homepage HTML includes a proper responsive viewport meta tag and a WordPress theme with mobile nav; no live Lighthouse mobile-usability test was run to confirm further.
Page Speed	5/10	Unable to fully verify — no PageSpeed/Lighthouse tool available in this audit. The homepage loads a large number of full-resolution PNG/JPG hero images (several 1024px source files) rather than uniformly compressed WebP, which is a real load-time risk.
Core Web Vitals	—	Unable to Verify — Core Web Vitals require Google's CrUX/PageSpeed Insights API, which wasn't accessible in this audit.
Technical SEO	6/10	HTTPS, canonical tags, and an XML/HTML sitemap link are all present, but the homepage reuses the exact heading text "Dentist Colorado Springs" as a section heading more than a dozen times, which is a real structural SEO problem.
On-Page SEO	9/10	The site runs a deep, well-organized service silo — Preventive, Children's, Cosmetic, Restorative, Implant, Periodontic, Orthodontic, Endodontic, Oral Surgery, Sedation, Sleep Apnea, Facial Aesthetics, PRF, Airway, Myofunctional, TMJ, Special Needs, Emergency, and Hospital — each with its own dedicated page.
Title Tags	9/10	Homepage title tag is "Dentist Colorado Springs | Vibrant Laser Dentistry" — leads with the primary local keyword and includes the brand name.
Meta Descriptions	5/10	Confirmed present (not missing, as often assumed): "Colorado Springs, CO dentist welcomes new patients. Visit our website to learn more about us." It's generic — it doesn't mention laser dentistry, PRF, or a compelling reason to click.
Header Structure	3/10	The homepage repeats the identical heading "Dentist Colorado Springs" across roughly 10+ separate content sections instead of unique, descriptive headers for each — confirmed directly in the fetched page content.
Internal Linking	10/10	Mega-menu navigation links three levels deep into dozens of individual service and technology pages, giving every service its own crawlable, linked page.
Image Optimization	6/10	Filenames are descriptive (e.g. "dentist-colorado-springs-01.webp"), and some images use WebP, but several homepage hero images are still full-size PNG/JPEG. Alt-text attributes weren't visible in the fetched page markup, so that piece is Unable to Verify.
Content Quality	9/10	Content is original, specific, and credential-backed (named doctor, academy memberships, detailed procedure explanations, real patient testimonials with specific clinical detail).
Blog Strategy	9/10	"Dental News in Colorado Springs" blog is highly active — confirmed posts

Category	Score	Assessment
		dated Aug 14, Aug 12, and Aug 10, 2026, roughly every other day, on relevant clinical topics (TMJ, PRF, facial pain).
E-E-A-T	9/10	Dr. Nichole Anderson's credentials and active memberships (American Academy of Implant Dentistry, Academy of Laser Dentistry, American Academy of Dental Sleep Medicine) are clearly stated, backed by specific, detailed patient testimonials.
Local Landing Pages	8/10	Single-location practice; no dedicated neighborhood/suburb pages exist, which is acceptable at this scale (N/A rather than a deficiency).
Primary Keyword Optimization	6/10	Rank tracking shows #1 for "vibrant laser dentistry" and #3 for "laser dental of colorado springs", but the flagship generic term "dentist colorado springs" doesn't appear in the top organic keyword pull — most of the 457 tracked keywords sit in the 51–100 position band per the organic position distribution chart.

Google Business Profile Audit

Category	Score	Assessment
Primary Category	5/10	Live listing displays as "Dental implants provider in Colorado Springs, Colorado" rather than a broader "Dentist" or "Cosmetic Dentist" category — this likely narrows visibility for general "dentist near me" searches even though the practice offers full general dentistry.
Secondary Categories	—	Unable to Verify — secondary categories aren't exposed on the public-facing listing.
Business Description	9/10	Confirmed present and detailed: describes pediatric dentistry, infant frenectomies, implants, TMJ/PRF, sleep apnea, facial aesthetics, LANAP, sedation, and hospital dentistry.
Services	8/10	GBP Products & Services panel confirmed populated with named entries: Laser Dentistry (Fotona), Clear Aligners, TMJ/TMD Treatment, Sleep Apnea Treatment, PRF Regenerative Dentistry, Dental Implants, Infant Frenectomy.
Products	7/10	Same panel doubles as the Products section and is actively populated with 7 named service/product cards with images — better utilized than most dental GBPs.
Photos	7/10	Listing shows a doctor photo, exterior shot, and a "See photos" gallery link confirming multiple photos are uploaded; exact photo count isn't exposed publicly.
Videos	—	Unable to Verify — no video content is visible on the public listing view captured.
Weekly GBP Posts	3/10	Listing shows "Updated by this business 10 weeks ago" — indicates the profile is not being refreshed weekly; no active Google Posts observed.
Questions & Answers	—	Unable to Verify — no public Q&A activity visible on the listing view captured.
Appointment Link	10/10	"Book online" button confirmed on the GBP listing, linking to the same

Category	Score	Assessment
		NexHealth scheduler used on the website.
Google Rating	10/10	Confirmed live via Google Business listing: 4.9 out of 5 stars.
Review Count	8/10	Confirmed live: 86 Google reviews — solid, though top local competitors in the space typically run higher.
Review Response Rate	—	Unable to Verify — owner responses to reviews aren't visible through the public listing data pulled.

Local SEO Audit

Category	Score	Assessment
NAP Consistency	10/10	Name, address (1920 Vindicator Dr Ste 209, Colorado Springs, CO 80919), and phone ((719) 599-5340) match exactly across the website footer, Google Business listing, Yelp, Yahoo Local, Nextdoor, and the Fotona provider directory.
Citation Consistency	9/10	Confirmed consistent listings on CareCredit, Yelp, Yahoo Local, Nextdoor, and the Fotona "Find a Doctor" directory, all matching NAP.
Local Backlinks	6/10	A live backlink pull shows 647 backlinks from 248 referring domains and an Authority Score of 14 ("Fine"); volume is decent but it isn't confirmed how many of these links are locally relevant vs. generic directory citations.
Location Pages	8/10	Single-location practice — no additional location pages are needed, which is appropriate at this scale.

Social Media Audit

Category	Score	Assessment
Facebook	6/10	Confirmed active page ("Vibrant Laser Dentistry") with 225 likes, 15 talking about this, 123 check-ins — a real but modest following for the market.
Instagram	7/10	Confirmed active account @dr_nichole_anderson_dds with 495 followers and 131 posts, bio specifically referencing implants, full mouth rehab, pediatrics, airway, frenectomies, PRF, and TMJ.
LinkedIn	2/10	No discoverable official LinkedIn page for the practice or Dr. Anderson turned up in search.
YouTube	2/10	No discoverable YouTube channel for the practice turned up in search.
Overall Social Activity	6/10	Facebook and Instagram are both live and active; LinkedIn and YouTube are unclaimed or undiscoverable, leaving two channels on the table.

AI Search Audit

Category	Score	Assessment
Google AI Overview Visibility	1/10	AI-visibility tracking shows 0 mentions and 0 cited pages in Google AI Overviews, and 0% of tracked SERP features are AI Overviews for this domain.
ChatGPT Visibility	2/10	AI-visibility tracking shows 0 mentions but 1 cited page in ChatGPT — a bare foothold, not real visibility.
Gemini Visibility	1/10	AI-visibility tracking shows 0 mentions and 0 cited pages in Gemini.
Perplexity Visibility	—	Unable to Verify — the AI-visibility tool used for this audit doesn't track Perplexity as a separate channel.
AI Search Readiness	3/10	Overall AI Visibility score is 14, driven almost entirely by Google's "AI Mode" (2 mentions, 4 cited pages). Tellingly, the Top Cited Sources for AI answers about this practice are ziprecruiter.com, wsperio.org, and nih.gov — third-party sites, not the clinic's own domain — meaning AI systems are currently answering questions about the practice without citing its own content.

Conversion Audit

Category	Score	Assessment
Online Booking	10/10	"Schedule Now"/"Book Now" buttons link to a live NexHealth scheduler across the site and on the GBP listing.
Live Chat	0/10	No live chat widget or chatbot found anywhere on the fetched homepage.
Click to Call	9/10	Confirmed in the page source: the phone number is wrapped in a genuine tel:+17195995340 link sitewide (header and footer), so it is already click-to-call enabled on mobile.
Contact Forms	7/10	A dedicated Contact Us page exists in the main navigation; form functionality itself wasn't directly tested in this audit.
Trust Signals	9/10	Doctor credentials, named academy memberships, an ADA Compliance page, a Zero-Tolerance Patient Harassment Policy, and a Weather Policy page all add up to unusually strong practice transparency.
Testimonials	10/10	A dedicated Testimonials page exists plus multiple detailed, specific patient testimonials embedded directly on the homepage.
Before & After Gallery	10/10	A dedicated "Smile Gallery" page is linked from both the About menu and homepage content.

Overall Scores

Metric	Score	Rating	Summary
Overall SEO Score	7/10	**Good**	Strong content depth, internal linking, and indexing; dragged down by repeated headers, a weak meta description, and unconfirmed page speed.
Overall Local SEO Score	8/10	**Strong**	Excellent NAP and citation consistency; the main gap is a mismatched GBP primary category and a stale (10-week-old) profile.
Overall AI Search Score	2/10	**Low**	Confirmed near-zero presence across Google AI Overviews, ChatGPT, and Gemini, with third-party sites — not the clinic's own domain — being cited when AI does mention the practice.
Overall Digital Presence Score	7/10	**Good**	A genuinely comprehensive website and an active Facebook/Instagram presence, offset by unclaimed LinkedIn/YouTube channels and a Google Business Profile that isn't being kept current.
Opportunity Score	8/10	**High**	The foundation (content, credentials, NAP, booking flow) is already excellent — most of the upside sits in low-effort fixes: GBP freshness/category, header structure, meta descriptions, and building genuine AI-search citations.

Top 10 Issues

1. Near-zero AI search visibility: 0 mentions/0 cited pages in Google AI Overviews, 0 mentions/0 cited pages in Gemini, and only 1 bare citation in ChatGPT — despite an active, clinically detailed blog that should be citable.
2. The clinic's own domain isn't among the Top Cited Sources when AI does answer questions about it — ziprecruiter.com, wsperio.org, and nih.gov are cited instead, meaning AI systems are shaping the practice's narrative without pulling from its own content.
3. Google Business Profile primary category shows as "Dental implants provider" rather than "Dentist"/"Cosmetic Dentist," which likely narrows visibility for broad, high-volume "dentist near me" searches.
4. GBP was last updated by the business 10 weeks ago, with no visible pattern of regular Google Posts — a stale, under-maintained profile in a category where freshness signals matter.
5. The exact heading "Dentist Colorado Springs" is repeated as a section header more than a dozen times across the homepage instead of unique, descriptive headers — a genuine technical SEO defect, not just a stylistic one.
6. The homepage meta description is present but generic ("Colorado Springs, CO dentist welcomes new patients...") and doesn't reference laser dentistry, PRF, or any differentiator — a missed click-through opportunity in the SERP.
7. No live chat widget anywhere on the site, despite a large volume of warm, service-specific traffic landing on dozens of individual treatment pages.
8. Most of the site's 457 tracked organic keywords sit in the weakest position bands (51–100), meaning the deep content library isn't yet converting into strong rankings outside a handful of branded/niche terms.
9. No discoverable LinkedIn or YouTube presence for the practice or Dr. Anderson, leaving two channels — professional referral network reach and video content for a highly visual laser-treatment offering — completely unclaimed.

10. Local backlink profile (647 links / 248 referring domains, Authority Score 14 "Fine") is respectable in volume but not confirmed to be locally targeted, leaving room for Colorado Springs–specific link building.

Quick Wins — 30-Day Fixes

✦ Rewrite the homepage meta description to reference laser dentistry, PRF regenerative treatment, and a clear CTA — the current one is generic and undersells the practice's actual differentiators.

✦ Fix header hierarchy: replace the repeated "Dentist Colorado Springs" section headings with unique, descriptive H2s (e.g. "Sleep Apnea Treatment," "TMJ/TMD Relief") that match what each section actually covers.

✦ Update the Google Business Profile primary category from "Dental implants provider" to "Dentist" (with implant/cosmetic dentistry as secondary categories) so the listing surfaces for general local search intent.

✦ Post to Google Business Profile weekly — the listing hasn't been updated in 10 weeks; the existing blog content (PRF, TMJ, laser therapy) can be repurposed directly into GBP posts.

✦ Add LocalBusiness/Dentist and FAQPage structured data to key service pages — none was detected, and it's one of the clearest levers for improving Google AI Overview and LLM citation eligibility.

✦ Add a live chat widget (e.g. Podium, Tidio) to capture the visitors already browsing the extensive service-page library before they leave.

✦ Compress and convert the remaining full-size PNG/JPEG hero images on the homepage to WebP to reduce page weight.

✦ Claim a YouTube channel and a LinkedIn business page — both are currently unclaimed despite a highly visual, credential-driven service offering well suited to video and professional referrals.

✦ Target Colorado Springs–specific local link building (chamber of commerce, local health directories, sponsorships) to convert the existing 647-link, 248-referring-domain footprint into more locally relevant authority.

✦ Push a modest review-generation campaign — 86 reviews at 4.9 stars is strong, but closing the organic-keyword gap with competitors like coloradospringsdental.com (591 keywords) will benefit from a larger, fresher review base feeding both Google and AI answer engines.
