DR. SIDNEY SOLOMON MORITZ, DDS — DENTAL IMPLANT GROWTH STRATEGY

Dental Implant Growth Strategy — Miami, Florida

12-Month Organic SEO, Local SEO, E-E-A-T, AI SEO, GEO & Future U.S. Expansion Plan

Prepared for

Dr. Sidney Solomon Moritz, DDS

Business name · Website · Google Business Profile — To Be Confirmed

Prepared by Md. Abdul Alim | Local SEO & AI Search Optimization Consultant | October 2026 | Confidential

THE GROWTH PATH

1. **Miami First**
   Core implant pages, Google Maps, reviews
2. **High-Value Miami Areas**
   Approved, researched location pages
3. **Florida Authority**
   Statewide expertise and trust
4. **Future U.S. Organic**
   Only after Miami is proven

EXECUTIVE SUMMARY

A Miami-First Plan for Implant Patients

12 months
A phased roadmap from research to expansion readiness

100% organic
Search, Maps, content, reviews and authority — no paid advertising

$300–$500 / month
Three execution levels, explained on the Investment page

What this plan will do

- Study the Miami implant market, competitors and patient questions first.
- Build a clear implant website and a complete Google Business Profile.
- Earn trust with verified credentials, honest reviews and expert content.
- Rank for high-value Miami areas through researched, unique location pages.
- Prepare the practice for AI search tools and for Florida and U.S. growth.

Why this order

Patients choose an implant dentist based on trust and cost clarity. We build local visibility and proof first, then widen the reach.

Miami First → High-Value Miami Locations → Florida Authority → Future U.S. Organic Expansion.

National growth is built on a proven Miami foundation — not assumed.

VERIFIED FROM CLIENT DOCUMENTS

- Implant-focused practice; cash-fee model with financing (client stated)
- English and Spanish-speaking; implant fellowship and AEGD residency on CV

Claims are reviewed against Florida dental advertising rules before publishing.

TO BE CONFIRMED BEFORE LAUNCH

- Business name, website and Google Business Profile status
- Clinic address, logo, headshot and clinic photos
- Exact treatment menu, financing terms and review count

MARKET RESEARCH

Miami Dental Implant Market Opportunity

Verified local facts (U.S. Census Bureau QuickFacts, Miami-Dade County) and strategic observations. No search volumes are shown — they are measured in Month 1.

2.8M
residents in Miami-Dade (2025 estimate)

18.3%
of residents are age 65 or older

75.3%
speak a language other than English at home

$71,753
median household income (2020–2024)

≈15%
of under-65 residents have no health insurance

What patients are looking for

Patient intent	Typical question	Value
Ready to book	"Implant dentist near me"	**High**
Cost shopper	"How much do implants cost?"	**High**
Full-mouth need	"Replace all my teeth"	**Highest**
Denture frustration	"Loose dentures, other options?"	**High**
Researcher	"Are implants safe? How long?"	**Builds trust**

Opportunity matrix (strategic observation)

	LOWER COMPETITION EFFORT	HIGHER COMPETITION EFFORT
HIGHER PATIENT VALUE	**Cost & financing guides** — clear pricing **Spanish-language guides** — bilingual care **Implant-supported dentures** — moderate rivals	**Full-mouth / full-arch** — highest value, tough field
STEADY PATIENT VALUE	**Recovery and candidacy guides** — trust builders	**Single tooth implants** — many rivals **"dental implants Miami"** — broad, contested

Observation: Miami has high demand and many providers. Third-party cost guides describe wide price ranges and "teaser" prices, so clear, honest cost education is a real trust advantage.

COMPETITOR ANALYSIS

How Miami Implant Providers Compete

Observations from public web pages reviewed in October 2026. Review counts, links and rankings are captured in the Month 1 audit — no traffic or ranking data is claimed here.

Competitor type	Strengths	Weaknesses / gaps	How we compete
National-style implant chains e.g., Affordable Dentures & Implants (Miami Lakes)	Published pricing pages, financing, insurance accepted, 440+ reviews shown on its own page	Standardized pages; the individual doctor is less visible	Doctor-led trust, personal bilingual consultations, clear cash pricing
Specialist-led implant centers e.g., Tetri's Smile (Miami); South Florida Center for Periodontics & Implant Dentistry (Boca Raton)	Board-certified specialist credentials, full-arch "one day" message	Premium positioning may leave cost-conscious cash patients under-served	Transparent cost education and financing guidance
Neighborhood general practices e.g., South Gables Dental (Coral Gables)	Local trust and neighborhood relevance	Implants are one service among many; thinner implant education	Implant-only focus with deeper patient guides
Cost-guide and directory sites	Detailed price explanations; broad keyword coverage	Not provider-specific; patients cannot see who will treat them	Doctor-reviewed cost and candidacy pages

Market gaps

Plain-language cost guidance, bilingual education, visible doctor credentials and a simple path from question to consultation.

Opportunities to compete

Win on clarity and trust: expert-led pages, honest reviews, location pages with real local detail, and strong Maps presence.

KEYWORD RESEARCH

What Miami Patients Search — Grouped by Intent

Keywords are examples of patient intent. Search volume and difficulty are measured with professional tools in Month 1 — none are invented here.

Core commercial

Commercial intent · Priority 1

- dental implants Miami
- implant dentist Miami
- dental implant consultation Miami
- dental implants near me

Home: Dental Implants Miami hub

Cost

Cost intent · Priority 1

- dental implant cost Miami
- full mouth dental implant cost
- implant financing Miami
- affordable dental implants Miami

Home: Implant Cost and Financing pages

Treatment

Treatment intent · Priority 2

- single tooth implant
- full mouth dental implants
- implant-supported dentures
- full arch implants (only if offered)

Home: Matching treatment page

Problem-based

Treatment intent · Priority 2

- missing teeth
- loose dentures
- failing teeth
- permanent teeth replacement

Home: Content guides, then service pages

Informational

Informational intent · Priority 3

- how dental implants work
- dental implant recovery
- who is a candidate
- dental implant lifespan, risks, aftercare

Home: Procedure, Recovery, Candidacy pages

Local

Local intent · Priority 2 (approved areas)

- dental implants Doral
- dental implants Kendall
- dental implants Coral Gables
- dental implants Brickell

Home: Approved location pages only

KEYWORD → SEARCH INTENT → RECOMMENDED PAGE

Matching Every Keyword to One Page

Keyword group	Search intent	Recommended page	Why one page each
dental implants Miami / implant dentist Miami	Commercial	Dental Implants Miami (main hub)	Owns the core query
dental implant cost Miami / financing	Cost	Dental Implant Cost + Financing	Cost and payment questions differ
full mouth / full arch / implant-supported dentures	Treatment	Full Mouth Implants + Implant-Supported Dentures	Different patient needs
single tooth implant	Treatment	Single Tooth Implant	One missing tooth, simple path
loose dentures / missing teeth	Problem-based	Content hub guides linking to service pages	Feeds patients to the right treatment
how implants work / recovery / candidate	Informational	Procedure, Recovery and Candidacy pages	Answers real questions
dental implants Doral / Kendall / Coral Gables	Local	Approved location pages only	Unique local content, no copies

No keyword competition between our own pages. Every main search phrase has one clear home page, and supporting pages link to it. “All-on-X” style terms are used only if the treatment is actually offered.

BUSINESS & SEO POSITIONING

Why Choose This Practice?

Draft positioning: "Implant-focused care led by an experienced, implant-trained dentist — with clear cash pricing, financing options and bilingual consultations."

Verified doctor strengths

- 20+ years of clinical training and practice
- 2-year CODA-accredited AEGD residency; Chief Resident (2013–2014)
- Implant dentistry fellowship, University of Miami School of Medicine (2002–2003)
- Oral & maxillofacial surgery studies, NYU (2004–2005)
- English and Spanish

Client-stated (to be verified)

- Implants are the focus; aligners will be a separate brand later
- Cash-fee model; no insurance accepted
- Financing offered for implant treatment
- Pricing positioned below many competitors
- Many patients are Spanish-speaking Latinos

Target patient & barriers

- **Who:** adults with missing or failing teeth, and denture wearers, in Miami
- **Pain points:** chewing, comfort, confidence
- **Barriers:** unclear cost, fear of surgery, doubt about the provider
- **Our answer:** clear pricing, doctor visibility, honest education

Title rule: training is described exactly as completed. Titles such as "specialist" are not used unless Florida advertising rules and counsel confirm they may be.

No unique selling point is invented. Any claim not on this page is confirmed with the client in writing before it appears on the website.

WEBSITE ARCHITECTURE

An Implant-Focused Website Structure

Home

Dental Implants Miami
Main commercial hub

- Single Tooth Implant
- Full Mouth Implants
- Implant-Supported Dentures
- Implant Cost & Financing
- Procedure & Recovery

Trust Pages
Why choose us

- About the Doctor
- Credentials & Training
- Patient Reviews
- FAQs
- Contact / Consultation

Location Pages
Approved areas only

- Doral
- Kendall
- Coral Gables
- More only after research

Education Hub
Real patient questions

- Am I a candidate?
- Implants vs dentures
- Recovery & aftercare
- Bone graft basics
- Spanish-language guides

Every page includes

A clear search purpose, patient-friendly answers, trust signals, FAQs, a strong consultation button, internal links and one next step.

Only what is offered

Pages are built only for treatments the practice actually provides. The treatment menu is To Be Confirmed with the client. Website Status — To Be Confirmed.

SEO FOUNDATION

Easy for Google to Understand. Easy for Patients to Use.

What we improve	Why it matters	Expected impact
Page visibility	Make sure Google can find and show every important treatment page	More ranking opportunities
Speed and mobile	Patients browse and call from phones without friction	Better experience; stronger SEO base
Broken pages	Remove dead ends that frustrate patients	A smoother patient journey
Page titles and headings	Tell Google and patients what each page covers	Clearer search listings
Connected pages	Link related pages so patients keep exploring	Stronger pages; more time on site
Consistent business details	Same name, address and phone everywhere	Fewer conflicting signals
Search-engine structured data	Helps search tools read doctor and practice details	Clearer listings and AI understanding
Tracking: Search Console, GA4, calls, forms	Know what brings real consultations	Decisions based on data

If we skip it: even great content can stay hidden or frustrate patients, and we could not prove what is working.

Win the Map Before the Website Matures

Google Business Profile — To Be Confirmed / Setup Required. A profile needs a real, verifiable practice location; the address is confirmed before launch.

Profile checklist

- Primary category chosen after the audit; secondary categories only if eligible
- Implant services listed accurately
- Clear business description, hours and appointment link
- Real photos: office, team, equipment, exterior, treatment areas
- Questions & answers and regular posts
- Steady review growth with replies
- Information that matches the website and listings exactly

Monthly activity plan

Week	Activity
1	Publish a helpful post (education or news)
2	Add fresh real photos; answer new questions
3	Reply to every review; check calls and clicks
4	Verify business details; report results

Expected business impact

More discovery · More calls · Website clicks · Stronger map visibility · Stronger trust

Why it matters: Google Maps can generate calls, website visits and consultation opportunities before the website reaches its full organic potential. **If skipped:** patients searching “near me” may never see the practice.

CITATION STRATEGY

Trusted Listings That Confirm Who You Are

Citations are trusted online business listings that help Google confirm that the practice name, address, phone number and business information are accurate.

Where we list

- Major directories (Google, Apple, Bing)
- Dental and healthcare directories
- Dental association profiles, where eligible
- Professional and alumni profiles
- Local Miami business listings

What we audit

- Business name, address and phone
- Website and business category
- Duplicate listings
- Old or closed listings
- Inaccurate information

What we will not do

- Hundreds of low-quality directories
- Spam listings
- Fake locations
- Duplicate profiles

Consistent name, address, phone | **Stronger local trust** | **Better Google confirmation** | **Stronger Maps foundation**

If skipped: if business information is inconsistent across the web, Google may receive conflicting signals and local visibility may suffer. Listings are built only after the practice name and address are confirmed.

REVIEW & TRUST GROWTH

Honest Reviews From Real Patients

Treatment visit or check-in → Friendly review request (link or QR) → Patient writes an honest review → Reply to every review → Monthly monitoring

Staff workflow

- Ask after a positive moment, such as a successful follow-up
- Make it easy: one short link
- Respond within a consistent time
- Flag concerns to the doctor privately

Review quality

- Steady, natural pace over bursts
- Spread across Google and trusted platforms
- Patients choose their own words
- Track themes to improve care

We never use

- Fake or purchased reviews
- Review gating
- Forced keyword reviews
- Misleading incentives

Business impact

Trust | GBP conversion | Click-through rate | Consultation confidence | Brand credibility

Current review count — To Be Confirmed. **If skipped:** patients compare reviews first; a thin profile can lose consultations to better-reviewed rivals.

Location Opportunity Matrix

Strategic ratings based on public area profiles — validated with Month 1 data. Not measured statistics. Miami is not treated as one keyword.

Location	Patient value	Search opp.	Competition	Access*	Priority	Page recommendation
Doral	High	High	High	High	**Primary Target**	Wave 1 page
Kendall	High	High	High	Medium	**Primary Target**	Wave 1 page
Coral Gables	High	High	High	Medium	**Primary Target**	Wave 1 page
Brickell	High	Medium	High	Medium	**Secondary Target**	Wave 2 page
Pinecrest / South Miami	High	Medium	Medium	Medium	**Secondary Target**	Wave 2 page
Hialeah	Medium	High	Medium	High	**Secondary Target**	Wave 2 page
Westchester / West Miami	Medium	Medium	Medium	High	**Secondary Target**	Wave 2 page
Miami Beach	High	Medium	High	Low	**Future Target**	After data
Aventura / Sunny Isles	High	Medium	High	Low	**Future Target**	After data
North Miami / N. Miami Beach	Medium	Medium	Medium	Low	**Future Target**	After data
Key Biscayne	Medium	Low	Medium	Low	**Not Recommended**	No page
Wynwood / Design District	Low	Low	Medium	Medium	**Not Recommended**	No page

**Access depends on the confirmed practice location (client indicated near the airport; a new office may change this). Wave 1 = Months 3–5; Wave 2 = Months 5–8.*

One Unique Page Per Approved Area

Every approved location page includes

- A unique local introduction
- Implant services offered
- Doctor and practice trust signals
- Local relevance and patient concerns
- Treatment benefits
- Cost and financing information where appropriate
- FAQs and a consultation button
- Links to the main implant page

Wave 1 — unique angles to develop

Doral	Business-district professionals and families near the airport corridor; bilingual care
Kendall	Large residential area; families and older adults replacing missing teeth
Coral Gables	Quality-focused patients who research credentials and training closely

Approval test: a page is created only if the area has real relevance, enough patient interest, unique content we can write, and reasonable access to the practice. Pages are published a few at a time, not all at once.

We will not create: fake locations, virtual-office pages, doorway pages, duplicated pages, copy-paste city swaps or dozens of pages that only change the neighborhood name.

One Connected Local System

Miami core page → High-value locations → Google Business Profile → Reviews → Citations → Local links → Consultation opportunities

Miami relevance

Clear service-area wording across pages and profiles

Neighborhood relevance

Real local detail on approved location pages

Local content

Guides built around Miami patient questions

Local professional profiles

Consistent doctor and practice profiles

Local media and partners

Healthcare and community partnerships where genuine

Internal linking

Core page and location pages support each other

If skipped: a website alone rarely wins Miami “near me” searches. Local signals work together — Maps, reviews, listings and nearby pages confirm the practice is real and relevant.

CONTENT STRATEGY

Commercial Pages First, Then Depth

1 · Commercial	2 · Decision support	3 · Trust	4 · Educational depth
Dental implants Miami	Am I a candidate?	Doctor education and credentials	Implant maintenance
Implant cost	Implants vs dentures	Training and clinical approach	Bone graft basics
Full mouth implants	What happens during treatment?	Treatment process	Longevity and aftercare
Single tooth implants	How long is recovery?	Patient education	Treatment risks
Consultation and financing	What affects cost?		Common questions

Helps with

Rankings, patient education, trust, consultation decisions, E-E-A-T and AI search. Key pages are considered for Spanish versions, given the practice's bilingual patients (to confirm).

The rule

We do not publish large amounts of low-value blog content before the commercial pages are strong. Every article answers a real patient question and links to a treatment page.

Credible Websites Recognize the Doctor and Practice

Professional profiles

- Dentist and healthcare profiles
- Dental associations where eligible
- Alumni profiles from training institutions
- Doctor biography pages

Local presence

- Local organizations
- Miami business communities
- Local media
- Genuine healthcare partnerships

Expert voice

- Interviews and podcasts
- Expert commentary
- Educational contributions
- Healthcare and dental publications

“Google should see that other credible websites recognize and reference the doctor and business.”

We do not use

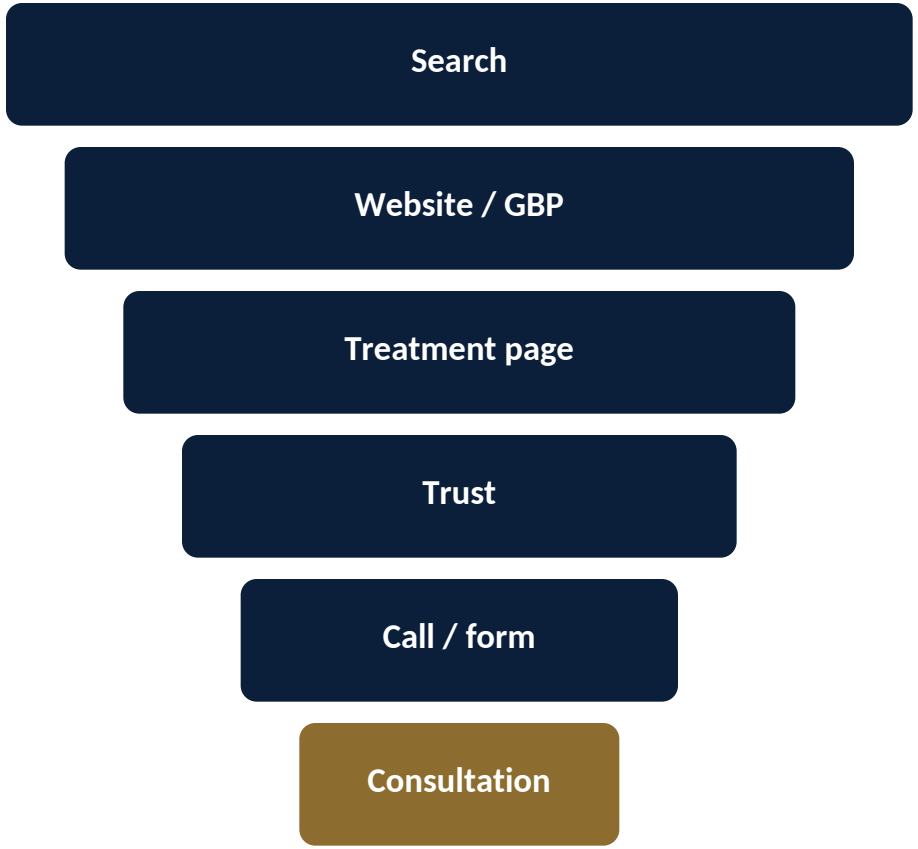

Private blog networks, link farms, bulk backlink packages, spam guest posts or irrelevant paid links.

What happens if we skip it

Even well-written pages struggle to outrank competitors that other trusted sites already reference.

CONVERSION STRATEGY

Turn Visibility Into Consultations

Traffic alone is not success. We track calls, forms and qualified implant enquiries.

What we improve (after visibility foundations)

- Click-to-call button
- Clear consultation buttons
- Short, simple forms
- Mobile-friendly pages
- Doctor trust sections
- Reviews on key pages
- FAQs that remove doubts
- Financing information
- Treatment process steps
- Easy contact options
- A dedicated consultation page
- Fast follow-up on enquiries

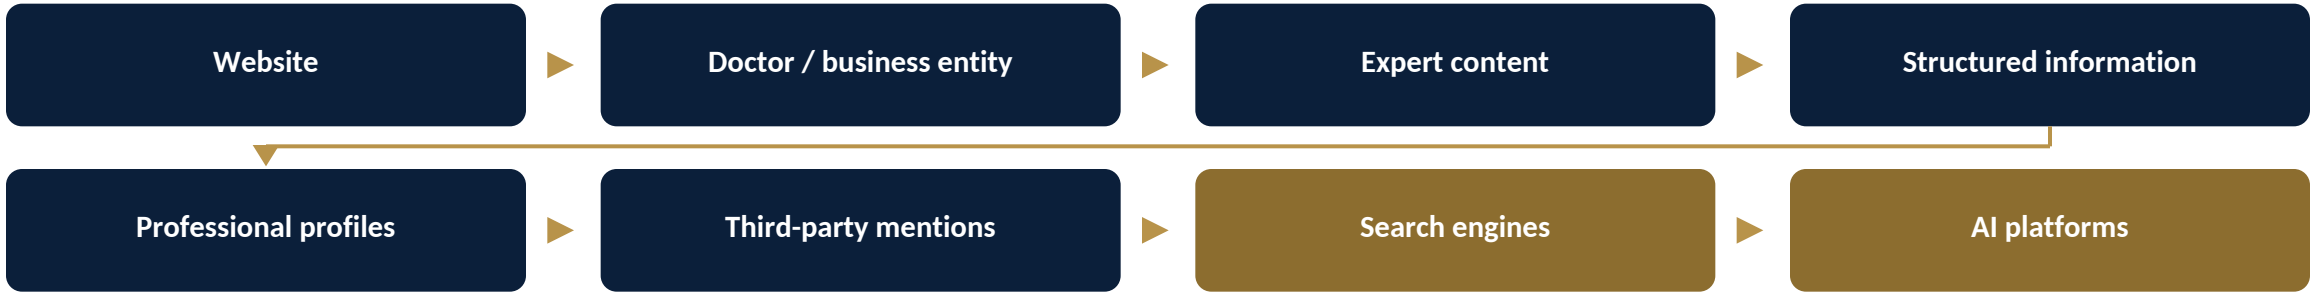

What we track

Phone calls · form submissions · consultation requests · qualified implant enquiries.

If skipped: visitors may read and leave without ever booking, and the investment in visibility does not become patients.

Be Easy for AI Tools to Understand and Trust

"Patients are increasingly asking Google AI, ChatGPT, Gemini and similar platforms questions about treatments and providers. Our website should be easy for these systems to understand, trust and reference."

Platforms we optimize for

- Google AI Overviews
- ChatGPT Search
- Gemini
- Bing / Copilot
- Other answer tools

Topics we cover

- Cost, candidacy and procedure
- Recovery and timeline
- Implants vs dentures
- Full-mouth and financing
- Safety and Miami provider questions

What we track

- AI brand mentions
- AI answer accuracy
- Source visibility
- Entity consistency

We improve clarity and eligibility. AI platforms choose their own sources — no AI citations, mentions or placements are guaranteed.

Build the Miami Foundation

Month 1 · Research

- Market and competitor research
- Keyword and location research
- Website, GBP and citation audit
- Tracking setup

Month 2 · Foundation

- Website architecture
- Main implant page and core service pages
- GBP optimization
- Business profile cleanup

Month 3 · Trust

- Citation cleanup and building
- Review workflow
- First priority location pages
- Consultation funnel

Month 4 · Commercial

- Cost and full-mouth pages
- Supporting treatment pages and FAQs
- Content and GBP activity
- Conversion improvements

Month 5 · Local authority

- More priority location pages
- Local links and professional profiles
- Review growth
- Commercial content expansion

Month 6 · Review

- Rankings, Maps and conversion review
- Location-page and content review
- Authority and AI/GEO review
- Strategy refinement

Expected Month-6 position (not guaranteed): stronger Miami relevance, a clearer website structure, more commercial pages indexed, early keyword movement, stronger Google Business Profile signals, better listing consistency, a growing review profile, more local authority and qualified consultation opportunities. No exact rankings, traffic or patient numbers are promised.

MONTHS 6–12 E-E-A-T & AUTHORITY

Deepen Trust, Expertise and Authority

E Experience

- Real practice visuals
- Doctor-led treatment explanations
- Patient journey content
- Practical FAQs

E Expertise

- Clinician-reviewed articles
- Doctor authorship
- Credentials and training pages
- Deeper treatment guides

A Authoritativeness

- Professional profiles
- Interviews and expert commentary
- Quality backlinks and digital PR
- Dental and healthcare publications

T Trust

- Consistent reviews and profiles
- Accurate claims
- Clear contact and privacy details
- Financing and process clarity

Continue throughout: Miami SEO · location-page improvement · content refreshes · AI SEO and GEO · entity consistency · review growth · local authority.

Also begins: Florida opportunity research — which nearby markets could fit the practice, based on real data rather than assumptions.

Step 1–2 · Validate Miami, Then Build Florida Authority

"National expansion should be built on a proven Miami foundation." This plan prepares for growth; it does not assume nationwide patients or nationwide practice.

Step 1 · Validate Miami first

- Miami keyword visibility
- Maps visibility
- Organic enquiries
- Consultation conversion
- Review growth
- GBP performance
- Commercial and location-page performance
- Content performance and authority growth

Decision: if Miami performance is still weak, we keep strengthening Miami before expanding.

Step 2 · Florida Opportunity Matrix (preliminary)

Market	Initial view	Class
Fort Lauderdale	Nearest large market	**Immediate**
Boca Raton	Close; high-value patients	**Immediate**
West Palm Beach	Reachable; test later	**Secondary**
Naples / Fort Myers	Longer distance	**Future**
Sarasota / Tampa	Separate market	**Future**
Orlando	Large, crowded market	**Future**
Jacksonville	Far from Miami	**Not Recommended**

Classes: Immediate · Secondary · Future · Not Recommended. Research covers implant search interest, competition, demand, patient value, travel and access. City pages are not built automatically.

Steps 3–7 · National Implant Topic Authority

Step 3 · National keyword research

- dental implants, implant cost
- full mouth implants
- implant-supported dentures
- implants vs dentures, financing, recovery

Step 4 · Education hub

- Cost, types and candidacy
- Procedure, recovery, bone grafting
- Maintenance and complications
- Expert-led, no thin content

Step 5 · National E-E-A-T

- Doctor-led expert content
- Interviews, podcasts, publications
- Digital PR and credible backlinks
- Independent proof of expertise

Step 6 · National AI SEO + GEO

- “How much do implants cost in the U.S.?”
- “Who is a candidate for full mouth implants?”
- Structured answers, expert insight

Step 7 · Video authority

- Cost, candidacy, recovery, timeline
- Implants vs dentures, financing
- Common mistakes, bone grafting
- Builds doctor visibility and AI support

THE GOAL

Miami Local Authority
→ Florida Authority
→ National Implant Topic Authority

No immediate national rankings are promised.

“To compete nationally, the business needs independent proof of expertise and authority, not only optimized pages.”

Steps 8–10 · Demand Evidence, States and Future Clinics

Step 8 · Out-of-state demand

- We do not assume patients will travel
- Monitor first: out-of-state traffic, enquiries by state, referral sources, travel questions, case value
- If real demand appears, we evaluate: Traveling to Miami for Implant Treatment; Out-of-State Consultation Process; Planning for Traveling Patients

Step 9 · U.S. Expansion Opportunity Matrix (decision framework)

Class	Search / competition	Patient value	Travel feasibility	Demand evidence
High Priority	Strong, manageable	High	Easy	Real enquiries
Test Market	Promising	Medium–High	Possible	Early signals
Future	Unclear	Unknown	Harder	None yet
Not Recommended	Weak or crowded	Low	Impractical	None

No state is pre-selected. States are classified only from real data (search demand, competition, population, economics, enquiries and brand demand). No 50-state pages are created, and no state page is built before research supports it.

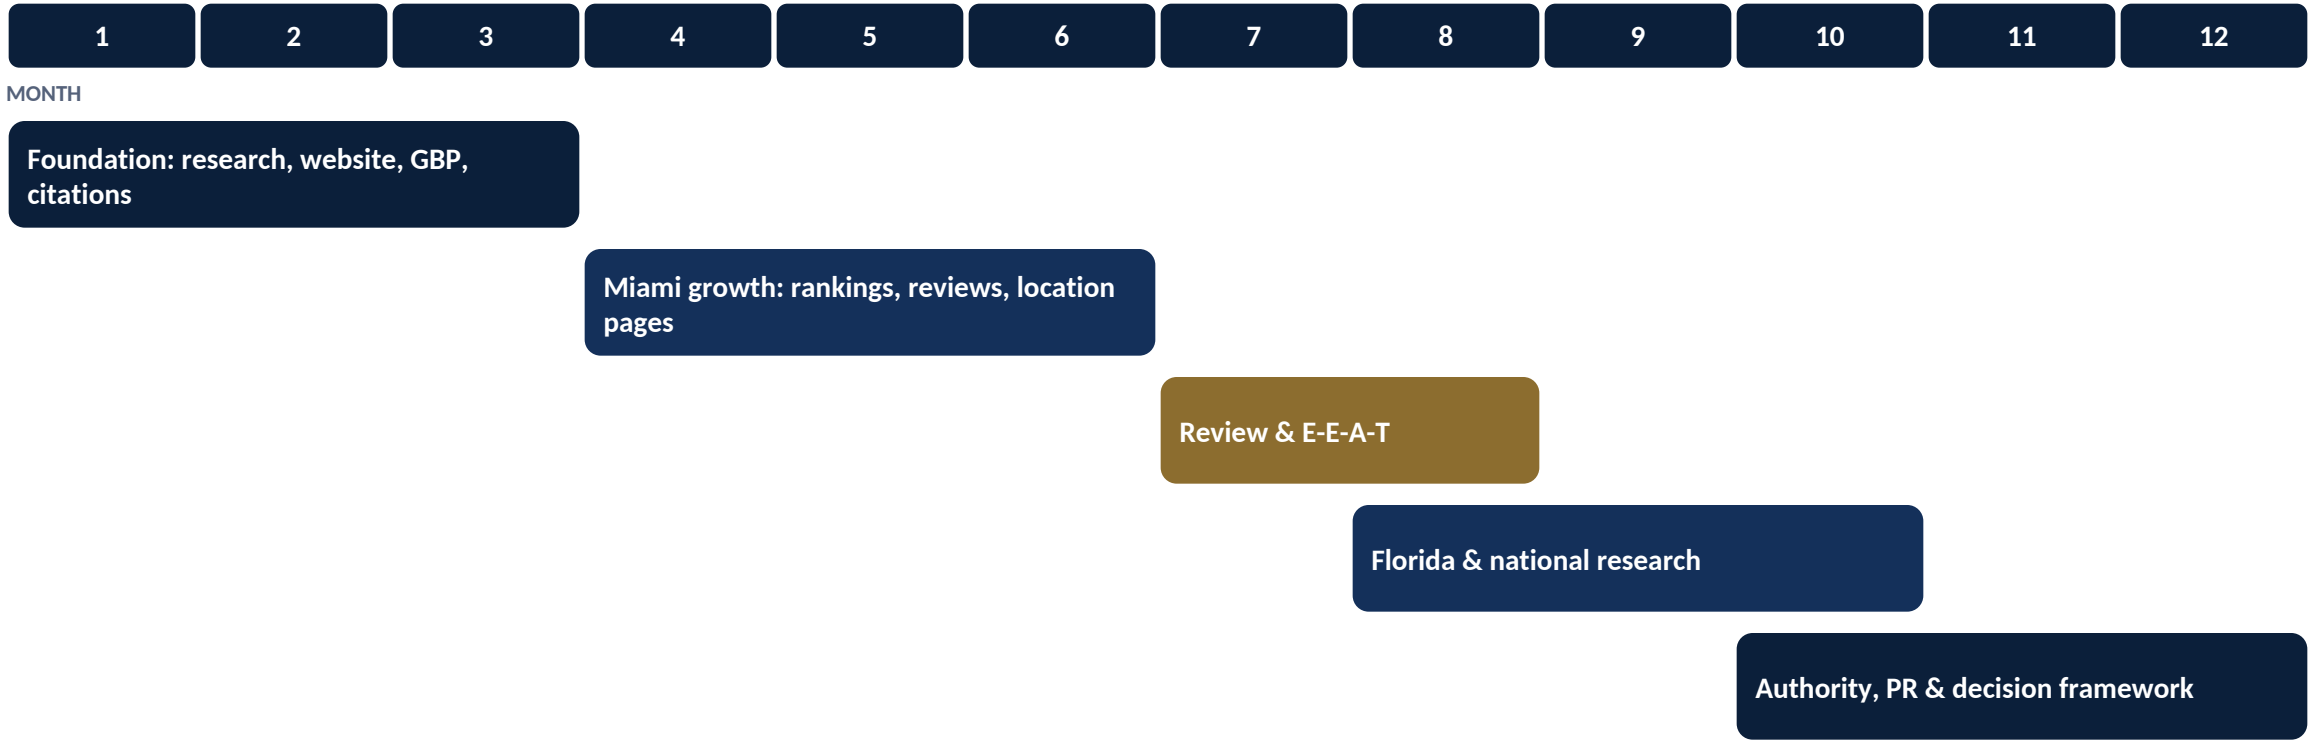

Step 10 · Future multi-state clinical expansion (a business consideration only)

If real locations ever open in other states, each may require a licensing review, an ownership and compliance review, a real treatment location, a local Google Business Profile, state and local keyword research, local pages, reviews, citations, links and PR.

National SEO does not equal permission to practice nationally. The practice is not presented as operating outside Florida.

12-MONTH ROADMAP

From Research to Expansion Readiness

Milestones

M1: audits complete

M3: first location pages

M6: full performance review

M8: expansion-readiness check

M12: expansion decision

What, Why, Impact — and the Cost of Skipping

Phase	What we do	Why we do it	Expected impact	If we skip it
Months 1–3	Research, website, Google profile, citations, main implant pages	A solid base before any growth work	Findable, trustworthy and ready for patients	Weak base; slow, uneven results
Months 4–6	Reviews, cost and full-mouth pages, location pages, local links	Win Miami searches and Maps	Keyword movement; more consultation opportunities	Rivals keep the best local positions
Months 7–8	Performance review, E-E-A-T, expert content	Deepen trust; judge expansion readiness	Stronger authority and clearer priorities	Decisions based on guesses
Months 8–10	Florida research, national keyword and AI/GEO planning	Choose growth by evidence	A focused, realistic expansion plan	Wasted effort in the wrong markets
Months 10–12	Authority content, digital PR, backlinks, Florida tests, decision framework	Build independent proof of expertise	Broader authority; clear next-step decision	Growth stalls at the Miami level

KPI & MEASUREMENT FRAMEWORK

How Progress Is Measured

Google visibility

- Important keyword movement
- Top 20 and Top 10 growth
- Local pack visibility
- Location-page visibility

Google Business Profile

- Calls
- Website clicks
- Discovery searches
- Direction requests, reviews

Website

- Organic traffic
- Commercial page traffic
- Location page traffic
- Engagement, consultation page

Leads

- Calls
- Forms
- Consultation requests
- Qualified implant enquiries

Authority

- Reviews
- Citations and profiles
- Quality backlinks
- Third-party mentions

AI / GEO (where measurable)

- AI brand mentions
- AI answer accuracy
- Source visibility
- Entity consistency

Future expansion

- Florida search visibility
- National topic visibility
- Out-of-state enquiries
- State-level traffic

Baseline first

Month 1 sets the starting point. We do not set numeric targets without baseline data.

Monthly reporting in plain language: what we did, what changed, what it means for consultations, and what comes next. Traffic alone is never treated as success.

INVESTMENT

Organic Growth: $300–$500 per Month

$300 / month

Lean execution

- GBP maintenance
- Basic SEO updates
- Review guidance
- Citation work
- Reporting and priority fixes

12-month total: **$3,600**

$400 / month

Balanced execution

- Ongoing SEO and content optimization
- GBP growth and local SEO
- Citation maintenance
- Selected location pages
- Authority development and reporting

12-month total: **$4,800**

$500 / month

Stronger execution

- More content and page work
- More location-page development
- Deeper local optimization, outreach
- E-E-A-T, AI SEO + GEO
- Conversion work; expansion research

12-month total: **$6,000**

Not included

- Paid advertising — none is part of this plan
- Domain, hosting and website build (To Be Confirmed)
- Photography, video production, legal or compliance review

Important

A higher monthly level means more work completed, not guaranteed rankings, patient numbers or AI citations. Results depend on competition, market and search-engine changes.

SCOPE / DELIVERABLES

12-Month Implementation Summary

Research & strategy

- Market Research
- Competitor Analysis
- Keyword Research

Foundation

- Website Architecture
- SEO Foundation
- GBP Strategy
- Citation Strategy
- Review Strategy

Miami growth

- High-Value Miami Location Strategy
- Local SEO
- Content Strategy
- Authority & Links
- Conversion Optimization

Authority & expansion

- AI SEO + GEO
- E-E-A-T
- Florida Opportunity Research
- Future U.S. Expansion Planning

Reporting

- KPI Tracking
- Monthly Reporting

Organic growth only. No paid advertising. No guarantees of rankings, patient numbers or AI citations. Items marked “To Be Confirmed” — business name, website, Google Business Profile, address, treatment menu and financing terms — are completed with the client before related work begins.
