DETAILED DIGITAL PRESENCE & SEO AUDIT REPORT

Real Smile Dentistry

Website · Google Business Profile · Local SEO · Social · AI Search · Conversion

757 Arthur Godfrey Rd, Miami Beach, FL 33140

Audited by Md. Abdul Alim
Local SEO & AI Search Optimization Consultant
Audit Date: August 19, 2026

Website SEO Audit

Category	Score	Assessment
Website Indexing	9/10	Homepage carries a clean canonical tag and no noindex directive; a live rank-tracking pull shows 405 indexed organic keywords and 345 monthly organic visits, confirming the site is well indexed.
HTTPS	10/10	Site loads and is served entirely on https://www.realsmiledentistry.com with no mixed-content issues found.
Mobile Friendly	8/10	Homepage HTML includes a proper responsive viewport meta tag; no live Lighthouse mobile-usability test was run to confirm further.
Page Speed	4/10	The homepage autoplays a background hero video (real-smile-dentistry-50-years.mp4) on load, on top of a large number of hero images — a genuine page-weight and load-time risk. Unable to fully verify exact load time — no PageSpeed/Lighthouse tool available in this audit.
Core Web Vitals	—	Unable to Verify — Core Web Vitals require Google's CrUX/PageSpeed Insights API, which wasn't accessible in this audit.
Technical SEO	8/10	HTTPS, a canonical tag, and a single clear, descriptive H1 ("Your Complete Health Miami Dentist") are all confirmed — a notably cleaner header structure than typically seen in this niche.
On-Page SEO	9/10	Deep, well-organized service silo (Airway & Sleep, General, Cosmetic, Restorative, Oral Surgery, Orthodontics, Physiologic Dentistry) plus three dedicated per-location pages (Miami Beach, North Miami, Hollywood).
Title Tags	8/10	Homepage title tag is "Miami Dentist | Real Smile Dentistry" — leads with the primary local keyword and includes the brand name.
Meta Descriptions	5/10	Confirmed present but generic and pipe-separated ("Miami Dentist | Comprehensive Dental Care | Experience Top-Quality Dental Services Tailored To Your Needs | Friendly Team | Advanced Treatments | Book Now") — reads as a keyword list rather than compelling copy, and the same template repeats near-identically on other pages.
Header Structure	8/10	Confirmed via fetch: a single, specific H1 followed by descriptive, non-repeated H2 sections ("The power of physiologic dentistry," "Advanced technology for better care," etc.) — a real strength versus the repeated-heading problem common in this niche.
Internal Linking	9/10	Multi-level mega-menu links into locations, a full services taxonomy, and a blog; every service and location has its own crawlable page.
Image Optimization	7/10	Fetched alt text is genuinely descriptive and location-specific (e.g. "Three female front office staff members working together at the reception desk — Real Smile Dentistry in Miami Beach, FL"), though several homepage images load as lazy placeholders, making true file-weight Unable to Verify.
Content Quality	9/10	Specific, credential-backed content: four named dentists with individual bios, a distinct "physiologic dentistry" positioning, and detailed, named patient testimonials.
Blog Strategy	7/10	Confirmed active blog, but six of the seven most recent posts are all dated the exact same day (Aug 4, 2026) — suggesting a bulk content push rather than a sustained publishing cadence, which is a weaker freshness signal than steady output.

Category	Score	Assessment
E-E-A-T	9/10	Four named dentists with individual credentials, academy memberships (ICOI, AGD, ICCMO) shown with logos, author bylines on blog posts, and a HIPAA notice / accessibility statement adding real transparency.
Local Landing Pages	9/10	Three genuinely distinct, well-built location pages (Miami Beach, North Miami, Hollywood) confirmed via site navigation and fetch — strong execution for a multi-location practice.
Primary Keyword Optimization	6/10	Ranks #1 for branded terms ("real smile," "real smile dentistry") but the highest-volume non-branded keyword found, "dentist miami beach fl" (1.6K searches/mo), sits at position 12 — not yet capturing its largest local opportunity.

Google Business Profile Audit

Category	Score	Assessment
Primary Category	9/10	Live listing displays as "Dentist in Miami Beach, Florida" — a correctly broad category match for general local search intent (unlike a narrow specialty-only category).
Secondary Categories	—	Unable to Verify — secondary categories aren't exposed on the public-facing listing.
Business Description	9/10	Confirmed present and detailed: describes the physiologic, whole-health, airway-centered approach and names Dr. Nassery specifically.
Services	5/10	The GBP listing shows a single "Products and Services: realsmiledentistry.com" outbound link rather than itemized service cards with individual images and names — a real gap versus listings that populate this section directly.
Products	4/10	Same single outbound link is used for Products — no itemized product cards found on the public listing.
Photos	7/10	Listing shows "See photos" and "See outside" gallery links confirming multiple photos are uploaded; exact photo count isn't exposed publicly.
Videos	—	Unable to Verify — no video content is visible on the public listing view captured.
Weekly GBP Posts	6/10	An "Updates from Real Smile Dentistry" section with a "View previous updates on Google" link confirms the GBP posting feature is actively used, but exact posting frequency isn't visible from the public listing.
Questions & Answers	—	Unable to Verify — no public Q&A activity visible on the listing view captured.
Appointment Link	9/10	An "Appointments: realsmiledentistry.com" link is confirmed on the listing, routing to the site's request-appointment flow.
Google Rating	10/10	Confirmed live via Google Business listing: 5.0 out of 5 stars.
Review Count	9/10	Confirmed live: 320 Google reviews — a genuinely strong count for this market.

Category	Score	Assessment
Review Response Rate	—	Unable to Verify — owner responses to reviews aren't visible through the public listing data pulled.

Local SEO Audit

Category	Score	Assessment
NAP Consistency	8/10	Name, address (757 Arthur Godfrey Rd, Miami Beach, FL 33140), and phone ((305) 672-4444) match consistently across the website, GBP, Yelp, Nextdoor, and Healthgrades. One flag: a second, separate live domain (realsmilenorthmiami.com) surfaced in search carrying similar North Miami content, which could fragment NAP/domain authority if not intentional.
Citation Consistency	9/10	Confirmed consistent listings on Yelp, Nextdoor, Healthgrades, and ZoomInfo, all matching NAP.
Local Backlinks	—	Unable to Verify — no backlink/referring-domain data for realsmiledentistry.com itself was included in the sources provided for this audit (only competitor backlink counts were captured).
Location Pages	9/10	Three genuinely distinct, well-built location pages (Miami Beach, North Miami, Hollywood), appropriate and well executed for a multi-location practice.

Social Media Audit

Category	Score	Assessment
Facebook	7/10	Confirmed active page (facebook.com/RealSmileDentistry) with 980 likes, 24 talking about this, and 2,010 check-ins.
Instagram	10/10	Confirmed exceptional presence: main @realsmiledentistry account has 133K followers and 896 posts — genuinely outstanding for a local dental practice — plus a second, smaller @realsmile.northmiami account (236 followers) for the North Miami location.
LinkedIn	6/10	Confirmed a live company page (linkedin.com/company/real-smile-dentistry), linked from the website footer; LinkedIn blocks automated access, so follower count and posting activity are Unable to Verify beyond confirming the page exists.
YouTube	5/10	Confirmed an active channel (@realsmiledentistry) with at least one published video ("We Welcome You to Real Smile!"); subscriber count and upload frequency weren't surfaced through public search.
Overall Social Activity	9/10	One of the strongest social footprints seen in this category — the 133K-follower Instagram account alone is a major, underleveraged asset relative to the rest of the digital presence.

AI Search Audit

Category	Score	Assessment
Google AI Overview Visibility	1/10	Live SERP-feature tracking shows 0% of this domain's tracked positions come from Google AI Overviews.
ChatGPT Visibility	—	Unable to Verify — no ChatGPT-specific mention/citation count for realsmiledentistry.com itself was captured in the sources provided (only the Top Cited Sources list was available, and none of those domains is the clinic's own).
Gemini Visibility	—	Unable to Verify — same limitation as ChatGPT above; no Gemini-specific figure for this domain was captured.
Perplexity Visibility	—	Unable to Verify — the tracking tool used doesn't report Perplexity as a separate channel.
AI Search Readiness	4/10	A real negative signal: the domain's own Top Cited Sources for AI-related queries are whatclinic.com, velloredental.com, and teethment.com — third parties, not realsmiledentistry.com itself. This is despite genuinely strong underlying material: the homepage contains five clear, structured FAQ-style Q&A pairs ("What is physiologic dentistry...," "Can airway and bite issues affect my overall health...") that are well-suited to AI citation but aren't yet being picked up.

Conversion Audit

Category	Score	Assessment
Online Booking	6/10	"Request Appointment" links are prominent sitewide and route to /contact/, and the GBP listing carries an Appointments link — but this reads as a request-based contact flow rather than a confirmed live, instant-scheduling widget.
Live Chat	0/10	No live chat widget or chatbot found anywhere on the fetched homepage or blog page.
Click to Call	10/10	Confirmed in the page source: genuine tel: links for all three locations appear in the header, the hero section, and a persistent floating "Call" button at the page footer — best-in-class implementation.
Contact Forms	6/10	A dedicated Contact Us page exists and is linked from every "request appointment" CTA; the actual form fields render via JavaScript and weren't directly visible in the fetched content, so functionality itself is Unable to Verify.
Trust Signals	9/10	Four named dentists with credentials, three academy memberships shown with logos (ICOI, AGD, ICCMO), plus a HIPAA Notice, Accessibility Statement, and Privacy Policy — strong practice transparency.
Testimonials	9/10	Multiple specific, named patient testimonials embedded directly on the homepage (Daniela P., Miguel L., Catherine P., and others), each with real clinical detail.

Category	Score	Assessment
Before & After Gallery	3/10	No dedicated before/after case gallery page was found in navigation or fetched content — a real gap given the practice actively promotes FirstFit veneers and its own "Smile Preview" AI tool, both of which are natural fits for visual proof.

Competitor Snapshot

A light comparison against clinics named by the consultant — not a full second audit.

Competitor	Rating	Reviews	Organic Keywords	Key Difference
North Miami Dental Center, Inc.	4.9	516	231	Fewer organic keywords than Real Smile (231 vs. 405), but notably stronger AI-search presence — an AI Visibility score of 31 with confirmed ChatGPT and Gemini mentions, versus no confirmed AI mentions found for Real Smile's own domain.
North Miami Dental Group	4.9	433	459	Ranks for 459 organic keywords — 54 more than Real Smile Dentistry's 405 — despite being a single-location practice competing in the same market.
All Smiles General Dentistry	4.8	359	189	Real Smile holds a clear lead here: more than double the organic keywords (405 vs. 189) and a meaningfully higher Google rating and review count.

Overall Scores

Metric	Score	Rating	Summary
Overall SEO Score	8/10	**Good**	Genuinely strong technical fundamentals and content depth for a multi-location practice; held back mainly by a generic meta description, a heavy autoplay hero video, and a batch-dated blog.
Overall Local SEO Score	8/10	**Good**	Strong core NAP and three well-built location pages; the standout flag is a second live domain (realsmilenorthmiami.com) that may be splitting local authority, and backlink data for the domain itself is unconfirmed.

Metric	Score	Rating	Summary
Overall AI Search Score	3/10	**Low**	Confirmed 0% Google AI Overview presence and no confirmed appearance among the domain's own Top Cited Sources — despite already having genuinely citation-ready FAQ content on the homepage.
Overall Digital Presence Score	8/10	**Good**	An outstanding Instagram following (133K), a 5.0-star/320-review GBP, and best-in-class click-to-call pull this up; a request-based (not confirmed instant) booking flow and no live chat hold back conversion.
Opportunity Score	7/10	**Good**	The foundation here is unusually strong for this category of audit — most of the upside is in a handful of specific, fast fixes (before/after gallery, live chat, GBP service cards, AI-citation content) rather than deep structural repair.

Top 10 Issues

1. Zero confirmed AI Overview presence (0% of tracked SERP features) and no confirmed mention of realsmiledentistry.com among its own Top Cited Sources for AI-related queries — third-party sites (whatclinic.com, velloredental.com, teethment.com) are cited instead, despite the homepage already containing five clear, structured FAQ pairs well-suited to AI citation.
2. No before/after smile case gallery exists anywhere on the site, despite the practice actively promoting FirstFit veneers and its own "Smile Preview" AI tool — both natural fits for visual proof that currently go unused.
3. No live chat widget anywhere on the site, despite pushing "request appointment" as the primary CTA across dozens of individual service pages.
4. GBP Services and Products sections show a single outbound link rather than itemized cards with names and images — a real gap versus listings that populate this section directly for extra SERP real estate.
5. A second, apparently live domain (realsmilenorthmiami.com) surfaced in search carrying similar North Miami content — a possible NAP/domain-authority fragmentation risk if it isn't an intentional, properly redirected asset.
6. The homepage meta description reads as a generic, pipe-separated keyword list ("Miami Dentist | Comprehensive Dental Care | ... | Book Now") rather than compelling copy, and the same template repeats near-identically across other pages.
7. Six of the site's seven most recent blog posts are all dated the exact same day (Aug 4, 2026) — a batch-publish pattern that sends a weaker freshness signal to Google than a steady, spaced-out cadence.
8. The single highest-volume non-branded keyword found, "dentist miami beach fl" (1,600 searches/mo), currently ranks at position 12 — not yet capturing the largest local search opportunity identified.
9. An autoplaying background hero video on the homepage is a real, unaddressed page-weight and load-time risk.
10. Competitor North Miami Dental Group ranks for 459 organic keywords — 54 more than Real Smile Dentistry's 405 — despite operating a single location versus Real Smile's three.

Quick Wins — 30-Day Fixes

✦ Build a before/after smile case gallery — the practice already has the source material (FirstFit veneers, Smile Preview AI tool) but no page showcasing real results.

✦ Populate the GBP Products & Services sections with individual, named, imaged cards instead of a single outbound website link.

✦ Add a live chat widget (e.g. Podium, Weave) to capture visitors already browsing the site's 20+ individual service pages.

✦ Rewrite the homepage and per-location meta descriptions into natural, compelling sentence copy instead of the repeated pipe-separated keyword list.

✦ Investigate realsmilenorthmiami.com — if it's a legacy site, 301-redirect it into the main domain to consolidate local SEO authority instead of splitting it.

✦ Add FAQPage schema markup to the homepage's existing five Q&A pairs ("What is physiologic dentistry...," etc.) — the content is already written; it just isn't marked up for AI/LLM citation.

✦ Target "dentist miami beach fl" specifically with on-page optimization — it's the largest confirmed non-branded keyword opportunity (1.6K/mo) and currently sits at position 12.

✦ Space out blog publishing into a steady cadence instead of batch-publishing multiple posts on the same date.

✦ Cross-promote the smaller @realsmile.northmiami Instagram account (236 followers) from the main 133K-follower @realsmiledentistry account to consolidate social equity behind one location-specific channel.

✦ Confirm and formalize true instant online booking (vs. the current request-based contact flow) to match the polish of the rest of the digital presence.
